An architectural rendering of a proposed single-story building. The building has a long, rectangular footprint with a red-tiled roof. It features a series of windows along its front facade, including a central section with four windows and side sections with two windows each. The building is set on a raised platform with a brown base and a green hedge in front. To the right of the building, there are two tall, thin trees and a small fence.

A 3D architectural rendering of a single-story building with a white facade and a red-tiled gabled roof. The building features three windows with black frames and shutters. To the left of the building is a large, leafy green tree. The building is set against a plain light blue background, and a low white wall is visible in the foreground.
